DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-53, drawn to a modular optical switch fabric and method, classified in class 385, subclass 16.
- II. Claims 54-58, drawn to a method of maintaining an optical switch, classified in class 359, subclass 110.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. Invention I is a optical switch fabric and method of directing light signal in an optical switch fabric; whereas Invention II is a method of maintaining an optical switch fabric. The particulars of the method of maintaining the switch are not required for the switch fabric or the method of directing light using the switch fabric.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Species

This application contains claims directed to the following patentably distinct species of the claimed invention, which are mutually exclusive of one another:

A first embodiment represented by figures 1, 5, 6, and 7.

A second embodiment represented by figure 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 23 are generic.

Applicant is advised that a reply to this requirement must include an identification of the Group elected and if Group I is elected, which species is elected consonant with this requirement, and a listing of all claims readable thereon. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. *Applicant can elect:*

1. Group I and the claims corresponding to the first embodiment, or
2. Group I and the claims corresponding to the second embodiment, or
3. The claims corresponding to Group II

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
